Advance Notice – Volkswagen Safety Recall 93EX/ High-Voltage (HV) Battery Cell Modules

This notice is for: All Dealer Personnel

Date: October 06, 2026

Issue: The root cause is presently unknown, however in certain high-voltage batteries within the affected vehicle population, certain charging profiles combined with a state of charge over 80% may trigger thermal propagation within the high-voltage battery. If thermal propagation occurs, it may result in a vehicle fire.

Until the recall remedy has been performed, owners will be advised to limit vehicle charging to 80%.

- Repair:**
- REPAIR NOT YET AVAILABLE
 - Until the recall remedy becomes available, dealers should diagnose customer vehicle concerns and perform repairs, if needed, following existing repair procedures. This work cannot be billed/claimed against the recall.
 - Dealers and owners will be notified in writing once the remedy is available.
 - Check daily campaign open inventory report or OMD for affected vehicles in inventory.
