New Safety Recall Advanced Communication – A2D

FCA US LLC (FCA US) has announced a safety recall on the following vehicles:

DODGE 2026 model year (WD) Dodge Durango

Template Version 1.0

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with taillamp assemblies which have a damaged internal connector which may cause the taillamp assembly to not function properly. An inoperative taillamp assembly can reduce vehicle visibility and fail to alert other drivers that the vehicle is braking, turning, or reversing, increasing the risk of a crash.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.108 requires vehicles be equipped with functional turn signal lamps, taillamps, stop lamps, and backup lamps. Taillamp assemblies with bent terminals in the wiring harness may not display the required lighting.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles to inspect, and if necessary, replace the taillamp assembly. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2026.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
