Dear «Owner_name»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided that the vehicles in the recall population may have Murphy beds with insufficient securement of the bed brackets to the wall. Under certain conditions when the Murphy bed is in the vertically stored position, the bed brackets may pull free from the wall leading to an increased risk of personal injury.

***What we
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to identify the location of the wall studs or backers and secure the bed wall brackets at the proper location. The service and parts required for this corrective action will be provided at no charge to you.

***What we
need you to
do***

Keep the Murphy bed in a horizontal, flat position. Take precautions when in the vicinity of the Murphy bed while it is in the vertically stored position until the repair is completed. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 1 hour. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.
