IMPORTANT SAFETY RECALL 26505

MAY 2026

NHTSA RECALL NO. 26V226

THIS NOTICE APPLIES TO YOUR VEHICLE IDENTIFIED ON THE ENCLOSED CARD.

Dear IC Bus Customer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

IC Bus has decided that a defect which relates to motor vehicle safety exists in certain 2022 thru 2027 IC Bus™ Electric CE Series school buses built 06/07/2021 thru 03/11/2026.

REASON FOR THIS SAFETY RECALL

On certain EV buses, an unconnected High-Voltage Disconnect Connector (HVDC) disconnect bypass circuit will continue to power the High-Voltage Distribution Module while the High-Voltage Disconnect Switch is in the OFF position.

RISK TO MOTOR VEHICLE SAFETY

An HVDC disconnect switch in the OFF position may indicate to a first responder, technician, or customer that the vehicle is deenergized when it may not be, possibly increasing the risk of electrical shock resulting in personal injury or death.

DEFECT REMEDY

The repair will involve removing the shorting bars in the HVDC Bypass Connector. The repair will be performed free of charge and take approximately 30 minutes to complete.
