This notice applies to your vehicle, VIN: [REDACTED]
Update Infotainment Control Unit Software
MBUSA ID: 2026050004, NHTSA Recall ID: 26V281

June 2026

- Your vehicle has received the remedy software
- No further action is required from you!

Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG, the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2024-2026 C-Class, CLE, E-Class, GLC, GT and AMG SL vehicles. **Our records indicate that your vehicle has received the software update** intended to remedy this condition.

What is the issue?

The infotainment control unit on your vehicle may experience increased system resets, resulting in an interruption in the Instrument Cluster's display that causes the screen to go blank while the system restarts. A blank screen would prevent the driver from being able to view critical driving-related information during the reset process, **such as the speedometer and warning lights, increasing the risk of a crash.**

What will owners need to do?

According to our records, your vehicle has already received the over-the-air (OTA) software update intended to address this condition. As a result of this, **no further action is required from you.**

We apologize for any inconvenience this may have caused and look forward to taking care of this important safety recall immediately.

Sincerely,
Mercedes-Benz USA
