Dear Land Rover Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Land Rover has decided that a defect which relates to motor vehicle safety exists in certain vehicles as listed above.

Your vehicle is included in this Recall action.

What is the reason for this program?

The driver's air bag clockspring connector may corrode, which can cause the air bag not to deploy as intended.

An airbag which fails to deploy as-intended will increase the risk of injury in the event of a crash.

What are the warning signs of this condition?

The airbag warning lamp will illuminate.

Are there any precautions that may be taken to minimize the safety risk until the corrective measures are implemented?

Until such time as the recall has been completed, customers are advised to ensure the driver is properly restrained with the seatbelt.

If the airbag warning lamp illuminates, please complete your journey then contact a JLR retailer / authorized repairer as soon as possible.

What will Land Rover and your authorized Land Rover Retailer do?

Land Rover is carrying out a recall of these vehicles to apply protective lubricant gel to the driver's airbag connector terminals. There will be no charge to owners for this repair.

What should you do?

Please contact your preferred authorized Land Rover retailer without delay and provide them with your Vehicle Identification Number (VIN) and request a service date to complete the work required under Program Code 'D120'.

How long will it take?

The work on your vehicle will be completed as quickly and efficiently as possible in order to minimize inconvenience to you and is expected to take no longer than 30 minutes to complete though your Land Rover retailer may need your vehicle for a longer time. Your Land Rover retailer can provide you with a better estimate of the overall time for the service visit.
