IMPORTANT SAFETY RECALL

This notice applies to you Yamaha CrossWave trailer. Model YAB16SESALT0 or YAB20SESALT0

NHTSA Recall No. 26V480

August 6, 2026

Dear Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Midwest Industries Inc. has decided that a defect, which relates to motor vehicle safety, exists for 2027 YAB16SESALT0 Yamaha CrossWave trailers.

WHY DOES MY TRAILER NEED REPAIRS?

Due to the design of the current trailer tongue, fatigue may develop creating an unsafe towing condition. Should someone use this trailer, and the tongue fail it could result in the trailer disconnecting from the tow vehicle causing a hazardous situation. A detached trailer increases the risk of a crash. A replacement galvanized steel tongue with winch assembly will be sent to dealers to replace the original aluminum tongue.

WHAT WILL YOUR DEALER DO?

When galvanized steel tongue replacements become available, they will be shipped to your dealer for replacement. Dealers will travel to your trailer or towing services will be provided to the dealership. Your dealer will complete the tongue replacement at no cost to you. The replacement should take approximately 2 hours to complete. However, due to scheduling, your dealer may require your trailer for longer. Your dealer should be able to provide a more accurate repair estimate.

WHAT SHOULD YOU DO?

Your dealer will reach out to you when the replacement tongue for your trailer is available. They will set up a time for the replacement tongue to be installed. Until the new tongue is installed the Stop Use Bulletin is in place.
