

GENERAL MOTORS  
DCS7526  
URGENT - DISTRIBUTE IMMEDIATELY

Date: June 23, 2026

Subject: N262563571 - Safety Recall  
Potential Steering Loss

Models: 2025-2026 Chevrolet Express  
2025-2026 GMC Savana

General Motors is releasing Safety Recall N262563571 today. The total number of U.S. vehicles involved is 41.

Vehicles involved in this recall were placed on stop delivery under Reference Number N262563570 on June 1, 2026. Once the service procedure contained in this bulletin has been performed on the vehicle, the vehicle is released from stop delivery and the vehicle can be delivered to the customer.

**All vehicles in this recall will require steering gear replacement. Due to limited inventory, do not order for shelf stock, parts are on restriction.** If you have one of the involved vehicles, you **MUST** place a CSO order and add a SPAC case with the associated VIN.

What Should Dealers Do: Dealers should review IVH, or the Dealer Maxis reports for open VINs in their inventory. Dealers can view the attached bulletin, and it will also be displayed in Service Information tomorrow.

The Stock VIN list of vehicles in dealer inventory or in-transit is attached to this message. Note: this list is only accurate at the time of report creation and all VINs should be validated in IVH prior to repair.

For dealers with involved vehicles, a listing has been prepared and will be available through GM Global Connect Maxis Field Action Reports or GWM Field Action Batch Search Report. The Inventory tab of the dealer reports will contain VINs that apply to this field action. This information is intended to assist dealers with the **PROMPT COMPLETION** of these vehicles. The Customer In-Service tab will contain customer names and addresses from Motor Vehicle Registration Records. The use of such motor vehicle registration data for any purpose other than follow-up necessary to complete this field action may be a violation of law in several states.
