IMPORTANT SAFETY RECALL

NHTSA Recall No. 26V469

Certification Label Replacement

Step 1 – Locate Labels

- Locate the Tire and Loading Information Label and Federal Certification Label on the roadside of the unit, front of the sidewall above the skirt metal.
- Locate the Cargo Carrying Capacity Label on the interior frame of the entry door.
- Locate the small V.I.N. label on the inside of the A-Frame on the off-door side of the vehicle.
- Locate the small V.I.N. label on the rear hitch on the right side of the receiver.

Label Examples

Step 2 – Obtain Photo Documentation

- Take a photo of the current certification labels installed.

Step 3 – Replace Labels

- Match the provided new label(s) with the current label(s).
- Remove current label(s) and clean surface with isopropyl alcohol.
- Carefully place the provided new label(s) directly where the current label(s) were.
- Take a photo of the replacement certification label(s) installed.

Step 4 – Claim Submission

- Submit a claim providing before and after images of the certification label installed.
