URGENT - DISTRIBUTE IMMEDIATELY

Date: October 29, 2026

Subject: N262570900 - Safety Recall
Loss of Braking at Low Speeds

Models: 2023-2027 Cadillac LYRIQ
2025-2026 Cadillac CELESTIQ
2026-2027 Cadillac VISTIQ
2024-2027 Chevrolet Blazer EV

General Motors is releasing Safety Recall N262570900 today.

This is a phased launch.

Software is NOT yet available for the 2023-2024 Cadillac LYRIQ vehicles. These vehicles were placed in “Incomplete. Remedy Not Available” status in IVH on October 29, 2026, and are on stop delivery until the software becomes available. Once software is available, this bulletin will be revised.

Certain vehicles involved in this recall were placed on stop delivery October 29, 2026. Once the service procedure contained in this bulletin has been performed on the vehicle, the vehicle is released from stop delivery and the vehicle can be delivered to the customer.

What Should Dealers Do: Dealers should review IVH, or the Dealer Maxis reports for open VINs in their inventory. Dealers can view the attached bulletin, and it will also be displayed in Service Information tomorrow.

The Stock VIN list of vehicles in dealer inventory or in-transit is attached to this message. Note: this list is only accurate at the time of report creation and all VINs should be validated in IVH prior to repair.

For dealers with involved vehicles, a listing has been prepared and will be available through GM Global Connect Maxis Field Action Reports or GWM Field Action Batch Search Report. The Inventory tab of the dealer reports will contain VINs that apply to this field action. This information is intended to assist dealers with the **PROMPT COMPLETION** of these vehicles. The Customer In-Service tab will contain customer names and addresses from Motor Vehicle Registration Records. The use of such motor vehicle registration data for any purpose other than follow-up necessary to complete this field action may be a violation of law in several states.
