96.2605A01	SR-26-05-0 – Current vehicle software version is at or above the required version of 2.10.0	Inspect	0.01
96.2605A02	SR-26-05-0 – Update vehicle to most current software version 2.10.0 or greater	SW Update	0.1

Technical Instructions

Note: For VINs included in this recall, if the software detects an inverter condition and issues an alert instructing the driver to schedule service immediately, the Gen 4 inverter will be replaced at no cost.

1. Verify the vehicle software version and ensure it meets or exceeds the **minimum required version of 2.10.0**
2. If the installed software version is **at or above** the specified minimum, the Safety Recall procedure is complete.
3. If the installed software version is **below** the required version, proceed with the Update Vehicle Software section.

Update Vehicle Software

1. Update the vehicle to version **2.10.0 or greater**.
2. Check and clear diagnostic trouble codes (DTCs).
3. Safety Recall is complete.
