26V-096	BMW Safety Recall 26V-096: Electrical Wiring	This safety recall involves the electrical wiring harness for the vehicle's climate control system, a portion of which is near a section of the cabin air filter's housing cover. When the cabin air filter is replaced during routine maintenance, a housing cover screw could damage the wiring harness. If this happens, then a short-circuit could occur which could lead to a thermal event or fire. BMW recommends not leaving the vehicle unattended with the engine running, which includes the use of the remote start function. BMW also recommends not using the remote function for air conditioning and heating. If you notice smoke or a burning odor near the air vents, your vehicle may be experiencing this issue. Do not continue to drive the	Important BMW Safety Recall 26V-096: Electrical Wiring. Contact an authorized BMW center immediately to get your vehicle repaired for FREE.
