Update Detail Screen Text:

- Important Update for GM Recall No. N26-2570900
- This important software update corrects an issue with the brake system in your vehicle. The brake system control module (BSCM) contains a software defect that may cause a temporary loss of braking at low speeds. This update will correct that condition, which is subject to GM Recall No. N262570900. You will receive a letter providing additional details regarding this issue.
- During the update process, your radio may stay on up to 5 minutes after you exit the vehicle. This is expected behavior.
