Subject: Forester Recall WRF-26

Subaru of America is voluntarily recalling sunroof-equipped Subaru Foresters manufactured between June 19, 2025, and March 17, 2026, due to a supplier process error improperly bonding the glass panels. The issue affects a small percentage of vehicles in the recall population, but all vehicles in the production range are being recalled out of an abundance of caution. Subaru retailers can quickly determine whether a vehicle is affected with a visual inspection. If the issue is detected, Subaru will replace the entire sunroof assembly at no cost to the consumer.

– Dominick Infante, Director, Corporate Communications, Subaru of America, Inc.
