

Dealer and Distributor Recall Notification

Subject: Immediate Stop Sale and Voluntary Recall – K&N and SPECTRE Fuel Filters

Dear Dealer or Distributor,

K&N Engineering, Inc. (K&N) has identified a potential product quality issue affecting certain K&N and SPECTRE fuel filters and is initiating a voluntary recall of the products listed below. Our records indicate that your organization may have purchased one or more of these products for resale.

Products Covered by This Recall

This recall applies only to the following fuel filter part numbers sold on or after July 1, 2025: K&N 81-0300, 81-0301, SPE-2358, SPE2369, SPE6932

No other K&N or SPECTRE fuel filter part numbers are affected by this recall.

Reason for the Recall

K&N has determined that certain O-rings used in the affected fuel filters may deteriorate over time. If deterioration occurs, debris could enter the fuel system and potentially result in vehicle performance-related issues. Because these fuel filters are designed for universal applications, they may be used in a variety of products, including passenger vehicles, all-terrain vehicles, personal watercraft, and light industrial equipment. As a result, K&N has implemented an immediate Stop Sale on all affected part numbers and is actively recalling inventory from the marketplace. K&N is offering purchasers a full refund for affected products, including reasonable return shipping costs.

Required Action

Please immediately review your inventory and sales locations for any affected products.

If you possess any of the recalled fuel filters: Immediately discontinue the sale or distribution of the affected products. Contact K&N at (866) 401-5660 or RecallReturn@knfilters.com. K&N will provide instructions for product disposition and issue a Return Authorization (RA) number for return and credit processing.

Retail Locations

If you sell these products through retail outlets, please post the enclosed recall placard in a prominent location near the fuel filter display area. The placard contains product identification information and instructions that will help consumers determine whether they have purchased an affected product and how to obtain a refund or additional information.

Distribution Chain Notification

If you supplied any affected products to distributors, dealers, retailers, or other downstream customers, please forward this notification and the enclosed recall placard to those parties within five (5) business days of receipt of this notice.

Important Legal Notice

Federal law prohibits the sale or distribution of any recalled product covered by this notification for use in a motor vehicle unless the condition giving rise to the recall has been remedied.

We apologize for the inconvenience this action may cause and appreciate your prompt cooperation. K&N is committed to ensuring product quality, customer satisfaction, and the timely removal of affected products from the marketplace.

If you have any questions regarding this recall, please contact K&N at (866) 401-5660 or RecallReturn@knfilters.com.
