**Subject: Warranty Extension for 2000 - 2003 Model Year Audi A4 or Audi TT
Equipped with 1.8L Turbo Engine**

Dear Audi Owner or Lessee,

We are writing to inform you that Audi is providing revised maintenance instructions and a warranty extension covering certain timing belt tensioner system related repairs on 2000 - 2003 model year Audi A4 and Audi TT vehicles equipped with 1.8L Turbo engines. Our records show that you are the owner of one of these vehicles.

IF YOU NO LONGER OWN OR LEASE THE VEHICLE, PLEASE DELIVER THIS LETTER, AND THE ENCLOSED MAINTENANCE BOOKLET INSERT AND CLASS ACTION SETTLEMENT NOTICE, TO THE CURRENT OWNER OR LESSEE, IF KNOWN.

What is the Issue?

Some Audi owners and lessees have reported internal engine damage resulting from a broken timing belt. If the timing belt of your vehicle were to break, the engine will not run and may sustain serious internal damage.

The Class Action Settlement

The programs which are outlined in this letter are part of a proposed settlement of a class action concerning this issue. The settlement has been preliminarily approved by the United States District Court for the Central District of California, and a formal Notice, also approved by the Court, is enclosed with this letter. The Notice explains the terms of the Settlement and your options in detail. Please read it carefully.

Please note that the revised maintenance recommendations and the extended warranty will go into effect immediately whether or not the proposed class action settlement is approved by the Court.

What Will Audi Do?

Audi is implementing an extended warranty for timing belt related engine damage for 2000 - 2003 model year Audi A4 and Audi TT vehicles equipped with the 1.8L Turbo engines to 105,000 miles, regardless of time in service. This extended warranty is fully transferable to any subsequent owner. This extended warranty does not affect - and is in addition to - any other applicable warranty covering your vehicle. This extended warranty does not cover replacement or repair of the timing belt system as part of scheduled maintenance or as indicated by inspection of the system.

In addition to the extended warranty, Audi is providing an inspection of your vehicle's timing belt and tensioner system, free of charge during your next scheduled maintenance at a mileage

of up to 105,000 The extended warranty will be voided if this inspection is not completed at an authorized Audi dealer within 1,500 miles of the next scheduled maintenance as required in the owner's manual or maintenance guide that was provided with your vehicle. **This inspection and other inspections required in the revised maintenance instructions included with this letter must be performed in order to qualify for the extended warranty. Be sure to retain proof of these inspections.**

If your vehicle has more than 105,000 miles, and the originally installed timing belt has previously been replaced, you may obtain a free inspection on or before September 30, 2008 at any authorized Audi dealer.

Audi will cover necessary engine repairs if a broken timing belt causes a malfunction in your engine at or before 105,000 miles and you have had the timing belt and tensioner system inspection completed within 1,500 miles of the next scheduled maintenance.

This warranty extension does not cover normal wear and tear or engine damage due to improper maintenance or timing belt or tensioner system repair or replacement which occurs as a result of recommended inspections.

Enclosed you will find a page insert for your maintenance guide regarding Audi's revised requirements for inspecting and replacing the timing belt and tensioner system. Please note the required inspection every 40,000 miles and mandatory replacement not later than 105,000 miles. Please insert into your maintenance guide.

What We Would Like You To Do

Please contact your authorized Audi dealer and arrange for an appointment so that the timing belt system inspection can be performed within the time requirements as described in this letter. This inspection will typically add approximately one half hour to the time required for your next scheduled maintenance. However, your dealer may need additional time for the preparation of the inspection as well as to accommodate the daily workshop schedule.

Please keep this letter with your Warranty Booklet and deliver it to any new owner, along with the Owners Manual and maintenance guide.

Reimbursement of Your Prior Out of Pocket Expenses

If you have previously paid for a repair as a result in a timing belt failure, regardless of mileage, Audi will reimburse you for the cost of repairs made to your vehicle, if you provide the requisite proof of repair, described in the Notice, upon making a timely claim no later than September 30, 2008. Additionally, Audi will reimburse your out-of-pocket expenses relating to the timing belt failure, such as towing, alternative transportation, etc. See Notice for completed details. All claims are being reviewed and processed by the court appointed claims administrator:

Settlement Administrator
