Subject: TIB 43-14, Clean Gas Induction (CGI) Gasket Campaign

Dear Kenworth Customer,

The chassis listed on this letter is equipped with the Caterpillar CGI system, which recirculates exhaust gas to the engine for reduced emission pollutants. Kenworth has identified a potential leak path at the exhaust delivery pipe connections in this system which, if uncorrected, could allow unfiltered outside air to enter the engine. Unfiltered air might carry dirt or debris which could result in damage to the engine. Uncorrected, there is also a potential for increased emissions. For these reasons Kenworth requests the opportunity to install specially designed gaskets at the CGI pipe connections.

Please make an appointment with your Kenworth dealer as soon as possible and refer to TIB 43-14 with the chassis listed on this letter when you call. A scheduled appointment will take approximately one hour and there will be no cost to you for repairs. To find your nearest Kenworth dealer, visit Dealer Locator at [www.Kenworth.com](http://www.Kenworth.com).

We apologize for the inconvenience but ask for your cooperation to ensure continued satisfaction with Kenworth products.

Thank you,

Mike Kalkoske  
Director, Quality Services  
Kenworth Truck Company.
