ROUSH
THE ART OF PERFORMANCE ENGINEERING™

Dear owners of 2004-2008 Ford F-150 vehicles manufactured by ROUSH® or upfitted with a retail Intercooled ROUSHcharger® kit,

RE: Customer Service Bulletin 092908CS-01

Our mission is simply to be the best. We define "best" as our commitment to continuous product improvement, which allows us to deliver continuous value. In the case of the ROUSHcharger® for your F-150, we have developed vehicle calibration enhancements to better accommodate regional variations in premium fuel quality. Even though not all F-150 ROUSHcharged™ vehicles will be affected by these variations, we believe our new calibration is significantly improved to previously released versions and would like to make it available to our customers. ROUSH® strongly recommends that our customers take advantage of this free service action to reduce the possibility of premature engine damage due to the noted variations in premium fuel quality. **Further, customers must continue to use premium fuel (91 MINIMUM OCTANE RATING (R+M)/2 Method) in their F-150 vehicles upfitted with the retail Intercooled ROUSHcharger® kit.**

Please schedule a service appointment with the service manager at your local Ford dealer and bring this service bulletin.

Ford servicing dealer please contact ROUSH® with any further questions,
