

OWNER'S LETTER

Dear Nissan Frontier Owner:

Nissan is committed to providing the highest levels of product safety, quality and customer satisfaction. We believe our success depends on providing you with an exceptional ownership experience. With that in mind, we want to bring to your attention important information about the four-wheel-drive system ("4wd system") in your Frontier.

REASON FOR CAMPAIGN

Your vehicle is equipped with a 4wd system that is operated by a dial switch inside the passenger compartment. On some model year 2010 Frontier vehicles, a component of the 4wd system (front propeller shaft yoke) was manufactured outside of Nissan specifications by a supplier. If your vehicle is equipped with one of these yokes, this part could weaken and possibly break when the vehicle is driven in 4wd mode. If that happens, the 4wd system in your vehicle will stop working and your vehicle will operate as if it were in two-wheel drive mode. Also, there will be a loud noise coming from under the vehicle.

While the ability to control the vehicle will not be affected, if this occurs, you should switch the vehicle to 2wd mode and have it brought in for service as soon as possible. To prevent the possibility of this happening, it is important that we promptly inspect your vehicle to determine whether it was manufactured with one of the affected front propeller shafts. If so, Nissan will replace the front propeller shaft free of charge for parts and labor.

WHAT NISSAN WILL DO

To assure your continued satisfaction and confidence in your Frontier, Nissan will inspect, and if necessary replace, the front propeller shaft in your vehicle. This service, free for parts and labor, should take 1 hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule. **Please contact your Nissan dealer to perform this important service.**

WHAT YOU SHOULD DO

We strongly recommend that you have this service performed as soon as possible and avoid using your vehicle in four wheel drive mode until the repair is completed.

Contact your Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired at no charge to you for parts and labor. Please bring this notice with you when you keep your service appointment. Instructions have been sent to your Nissan dealer.

If you have additional questions you may contact the National Consumer Affairs Department, Nissan North America, Inc., P.O. Box 685003, Franklin, TN 37068-5003. The toll free number is 1-800-NISSAN1 (1-800-6477261).

Thank you for your cooperation. We are indeed sorry for any inconvenience this may cause you.
