6. When the screen below appears, press ENTER on the Flash Pack to begin the update.

NOTE: If the update has already been done, the screen indicates that the software is up to date. Go to step 8.

The following screen appears indicating the battery sensor software is being updated. Do not disconnect any of the Flash Pack connections.

NOTE: If the Flash Pack displays a red screen with the message PLEASE REPLACE BMS, try the update again. If it fails a second time, record the error code on the repair order, replace the battery sensor, then go to step 10.

7. Wait until the update is done (the screen turns green).

8. Disconnect the Flash Pack clamps and the 2P connector.

9. Reconnect the battery sensor 2P connector.

10. Charge the battery with the GR-8 Diagnostic Battery Station using the **Diagnostic** and **DEALER INVENTORY** settings.

11. Reinstall the air intake scoop.

12. Center-punch a completion mark above the seventh character of the engine compartment VIN:

Product Update: MID Shows BATTERY CHARGE LOW or bATT LOW

Dear Honda Owner:

This letter is to notify you of improvements Honda has made to the battery sensor system installed on your vehicle.

What is the problem?

In some cases, the battery sensor system may send a message showing that the battery is in a low state of charge. Honda has developed enhanced software to improve the accuracy of sending this message.

What should you do?

Contact any authorized Honda dealer for an appointment to have your vehicle's software updated. The dealer will update the software in the battery sensor. This work will be done free of charge. Please plan to leave your vehicle at the dealer for half a day to allow them flexibility in scheduling.

Lessor Information

If you are the vehicle lessor receiving this product update notice, please forward a copy of this notice to the lessee.
