

## SERVICE INFORMATION BULLETIN

**Subject:**

**INFORMATION AND PROCEDURE FOR CHECKING AND CLEANING OF THE BREATHER HOSE ON THE DEF TANK**

This document is to inform dealers and workshops on how to check and clean the breather hose on the DEF tank

**1. RELEVANT MODELS:**

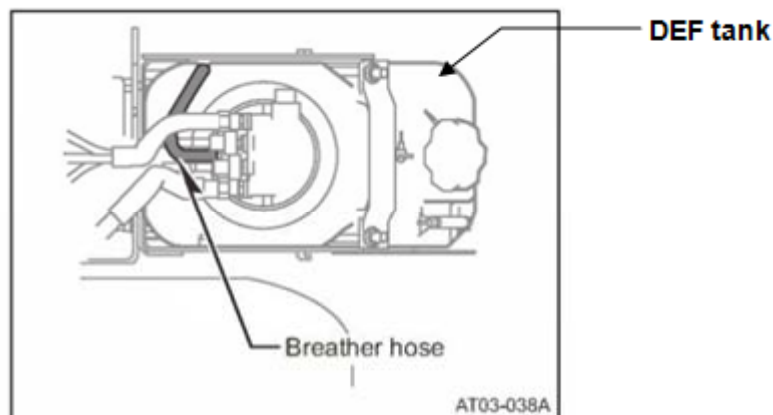

2011MY, 2012MY (238, 258, 268, 338, 358)  
DEF tank equipped vehicle

**2. CONDITION:**

The breather hose can clog up with crystallized DEF, which can cause the DEF to overflow from the tank when filling and not allow the tank to be completely filled. In this case, clean the breather hose in accordance with the following procedures;

**3. PROCEDURE:**

- a) Pull out the end of the breather hose from the DEF tank.
- b) Rinse the inside of the breather hose with clean water.
- c) Reinstall the breather hose securely.

This information has already been included in the owner's manual of 2012MY.
