Subject: TIB 43-027, Certified Clean Idle Decal Removal Campaign

Dear Kenworth Customer,

The vehicle identified by VIN on this letter was inappropriately manufactured with a California Air Resources Board (CARB) Certified Clean Idle decal on the driver's side door. This decal inappropriately identifies your engine and exhaust system as having been subjected to CARB certification and Kenworth would like the opportunity to correct this misidentification.

CARB requirements were established for heavy duty diesel engines, but your vehicle was manufactured with a gas fueled engine. Your engine and exhaust are emissions regulation compliant and California Registry is applicable, but your engine is exempt from CARB clean idle requirements and should not have a decal to indicate that it is subject to CARB regulation.

To correct the inappropriate vehicle labeling, please contact a Kenworth dealership and schedule an appointment for repair. You can find the nearest Kenworth dealer at Dealer Locator on the website www.Kenworth.com.

When contacting your selected Kenworth dealer, refer to campaign TIB 43-027 and the VIN listed on this letter. The repair will take less than an hour and there will be no charge to you.

We apologize for this inconvenience but ask for your cooperation to ensure continued satisfaction with Kenworth products.

Thank you,

Mike Kalkoske
Director, Quality Services
