

June 13, 2012

Dear Blue Bird Owner,

The current 90 degree zinc breakaway adapter used in the fuel vent system does not meet Texas Railroad Commission requirements of NFPA 58 on certain 2009-2013 model year Vision buses equipped with GM 8.1L propane engines. Blue Bird now has available a new 90 degree steel fitting and breakaway adapter that meets the NFPA 58 requirements. This new 90 degree steel fitting and breakaway adapter must be installed according to the attached instructions for Service Bulletin S12VC. (Copy attached)

Your buses affected by Service Bulletin S12VC are identified by Blue Bird body number(s) on the enclosed cover sheet.

You may contact your Blue Bird dealer to arrange to have Service Bulletin S12VC performed. Or, if you prefer, you may perform Service Bulletin S12VC yourself or have a qualified repair facility convenient to you perform this service bulletin. A qualified technician should perform Service Bulletin S12VC.

Time to install the new fitting according to Service Bulletin S12VC is 0.5hrs (30 minutes) per bus.

Parts required to perform Service Bulletin S12VC must be ordered through your Blue Bird dealer.

Service Bulletin S12VC ends one (1) year from date of issue. Claims for repairs performed after the end date cannot be submitted to Blue Bird.

Should you have any questions concerning this bulletin, please contact your Blue Bird dealer.

Sincerely,

Bill Coleman
