

Audi ElsaWeb Newsletter

Welcome to the new ElsaWeb Newsletter

This newsletter will be a weekly email written for technicians to update you on all things new in ElsaWeb. The newsletter will be sent out at the beginning of the week to inform you of changes made to ElsaWeb in the previous week. It will include sections for ElsaWeb related news, a summary of feedback status and feedback updates, highlights/tips from the previous weeks' changes and summary tables of the information that has changed in the past week, this may include technical bulletins, campaigns, RVU's, wiring diagrams, repair manuals, & labor operations). We from the Service Information team hope that you find this information useful and valuable.

Feedback Corner

In the Feedback Corner, each week will have a weekly status of open ElsaWeb feedback and a highlighted feedback. The feedback of the week is from John, regarding a 2012 Audi A6 Sedan (4G2). He says:

"It is not listed in center console removal and installation that you must disconnect the driver side and passenger side LED light strips before attempting to remove the console. Failure to do so will result in a damaged harness and/ or housing."

A technical editor reviewed this feedback and verified the concern with the factory. The repair manual has been updated to reflect the changes. John included his full name and email with the feedback and will receive Audi Winners Circle rewards for helping improve the quality of the repair information.
