Bulletin No.: PI0821

Date: September, 2012

PRELIMINARY INFORMATION

Subject: Correct Part Usage for Camshaft or Cylinder Head Replacement

Models: 2009-2011 Chevrolet Aveo
2009-2010 Pontiac G3, Wave
Equipped with 1.6L Engine (RPO LXV)

When replacing a camshaft or a cylinder head with camshafts, it is important to verify you have the correct parts due to a potential packaging error.

The new camshafts will have a etched mark on them that identifies whether it is an exhaust (EX) or intake (IN) camshaft and the model year it fits.

Be sure to verify that you have the correct combination of parts before installing them on the engine. Refer to the illustration below, which shows the correct camshaft identification.
