

# Service Bulletin

## PRELIMINARY INFORMATION

**Subject:** Flutter Or Rattle Type Noise From Front Of Vehicle While Driving

**Models:** 2012 Chevrolet Sonic

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

A customer may comment that they have a rattle, clunk or flutter type noise coming from the front of the vehicle while driving. The dealership technician may have a difficult time isolating the source of the noise.

### Recommendation/Instructions

Inspect the upper radiator baffle for a loose or missing clip, See picture below for area of concern:

If no concerns are found with the baffle, proceed with using chassis ears on various components and locations of the vehicle to help isolate the area of the concern.

### Warranty Information

For vehicles repaired under warranty use:

Labor Operation	Description	Labor Time
B1316	Radiator Grille Opening Cover Replacement	Use Published Labor Operation Time

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools,

safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
