PRELIMINARY INFORMATION

Subject: Clarification On Fuses to Aid In Diagnosing Inoperative Turn Signals, Trunk Actuator, or BTSI

Models: 2006-2013 Chevrolet Impala
2006-2007 Monte Carlo

This PI was superseded to update model years. Please discard PIC4136C.

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition/Concern

Due to the common architecture Body Control Module (BCM) utilizing several fuses for power, and the labeling of the fuses, it is possible to overlook some fuses in the Under hood Bussed Electrical Center (UBEC) when diagnosing a concern with the turn signals, trunk actuator, courtesy lamps, or Brake Transmission Shift Interlock (BTSI).

Recommendation/Instructions

If the fuse in the UBEC labeled RT T/SIG is open it will cause the right rear turn signal, the trunk actuator, and the BTSI to be inoperative.

Note: The right front turn signal will still function. If the fuse in the UBEC labeled INT LIGHTS is open it will cause the right front turn signal to be inoperative.

Note: The right rear turn signal will still function and the courtesy lamps will still function. If the fuse in the UBEC labeled INT LTS/PNL DIM is open the courtesy lamps will be inoperative.

Note: The instrument panel cluster backlighting will still function.

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
