

Technical Service Bulletin

91 MMI3G+ Google Earth will not load (Zug 566)

91 12 70 2032240/1 December 21, 2012.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A8	2011-2013	All	MMI 3G+ with Audi Connect
A6/A7	2012-2013		
Q7	2012-2013		
A4/A5/Q5	2013		

Condition

Customer Complaint:

The Google Earth map will not load.
The display shows an active data connection, and 'Google' is almost fully white (Figure 1).

Figure 1. Google Earth will not load.

Workshop Findings:

- Customer has active Audi Connect subscription.
- All other Audi Connect functions operate normally.
- The concern only occurs if the vehicle is started in a 2G cellular zone. The system operates normally if started in a 3G cellular zone.

- The vehicle has MMI software 0566 installed (Figure 2). This can be located under *Menu >> Setup MMI >> Version information*.

Figure 2. Location of MMI software level.

Technical Background

Certain Audi Connect partner carriers are transmitting data that is not supported by the MMI. The data disrupts the loading process of Google Earth and causes it to not completely load.

Production Solution

Revised software for MY 2014.

Service

Instruct the customer that the issue is known and a solution is in development.

Do *not* replace any components. This TSB will be revised when a service solution becomes available.

Warranty

This TSB is informational only and not applicable to any Audi warranty.
