

Detroit Diesel Corporation
13400 Outer Drive, West
Detroit, Michigan 48239-4001
Telephone: 313-592-5000

Attention Owner:

Detroit Diesel Corporation (DDC) has determined that all certified EPA07 and some EPA10 DD13 engines installed in Freightliner Cascadia 113" Day Cab chassis have the primary emission label on the engine **obscured** by the **vehicle air cleaner housing**. Federal regulations **require** that the **emission label** be visible without removing any parts or components when installed in the vehicle.

Records indicate that your vehicle has one of these affected engines. Installation of a secondary emission label will prevent non-compliance with Federal regulations that may result in customer dissatisfaction.

Enclosed is an Emissions Label for your engine(s) along with step-by-step instructions. You may replace the label yourself or you may contact your closest Authorized Detroit Diesel Repair Facility to set up an appointment. The scheduled time for replacement of the emission control label is approximately **0.3 hour**.

If you do not own the vehicle that corresponds to the identification number(s), which appears on the Recall Notification, please return the notification to Detroit Diesel, Attention: Frank Seymour, with any information you can furnish that will assist us in locating the present owner.

We regret any inconvenience this action may cause but feel certain you understand our interest in conforming to required regulations and environmental protection.

If you have any questions or need further information, please contact the **Customer Support Center at (800) 445-1980**.
