

SUBJECT

State of Charge Not Displayed in Instrument Cluster

MODEL

F30 (ActiveHybrid 3)

SITUATION

The high-voltage battery state of charge is not visible in the Instrument Cluster when called up through the Board Computer (BC). This condition may be present intermittently.

State of charge display not present.

State of charge display present.

CAUSE

Instrument cluster replacement or importing of the personal profile

CORRECTION

DO NOT replace any parts or perform any programming. Do a PIA reset (personal profile) using Service function “AS6510_CICCKM-Deleting Personal Profile” in ISTA/D. The path to the service function is shown below:

Service function / 03 Body / Headunit / Start search / AS6510_CICCKM-Deleting Personal Profile

A permanent solution will be available in a future ISTA/P version. This bulletin will be updated at that time.

WARRANTY INFORMATION

Not applicable.
