

# Technical Service Bulletin

SUBJECT: <b>DRIVER'S CENTRAL DOOR LOCK SWITCH ROCKER BUTTON REPLACEMENT</b>			No: <b>TSB-12-54-015</b>
			DATE: <b>November, 2012</b>
			MODEL: <b>See below</b>
CIRCULATE TO:	<input type="checkbox"/> GENERAL MANAGER	<input checked="" type="checkbox"/> PARTS MANAGER	<input checked="" type="checkbox"/> TECHNICIAN
<input checked="" type="checkbox"/> SERVICE ADVISOR	<input checked="" type="checkbox"/> SERVICE MANAGER	<input checked="" type="checkbox"/> WARRANTY PROCESSOR	<input type="checkbox"/> SALES MANAGER

## PURPOSE

The driver's side central door lock switch rocker button is now available through spare parts. It is no longer necessary to replace the entire switch assembly for a broken switch rocker button. This TSB provides the part number and instructions for installation of a new driver's central door lock switch rocker button.

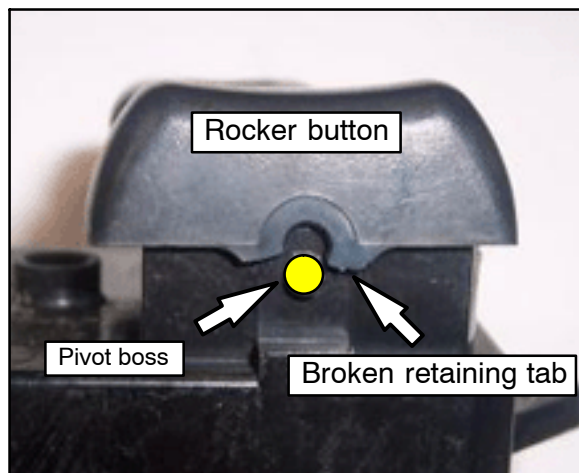

**NOTE:** This procedure CANNOT be used on the passenger's side central door lock switch.

## AFFECTED VEHICLES

2007-2012 Eclipse  
2007-2012 Eclipse Spyder  
2007-2011 Endeavor  
2007-2012 Galant

## REPAIR PROCEDURE

1. Record the customer's radio presets on the repair order.
2. Remove the negative (—) battery cable.
3. Follow service manual instructions to remove the power window/central door lock switch assembly (driver's side) from the inner door panel.
4. Use a small, flat blade screwdriver to pry the retaining tabs outward and off the pivot bosses, and remove the broken rocker button.

### !! IMPORTANT !!

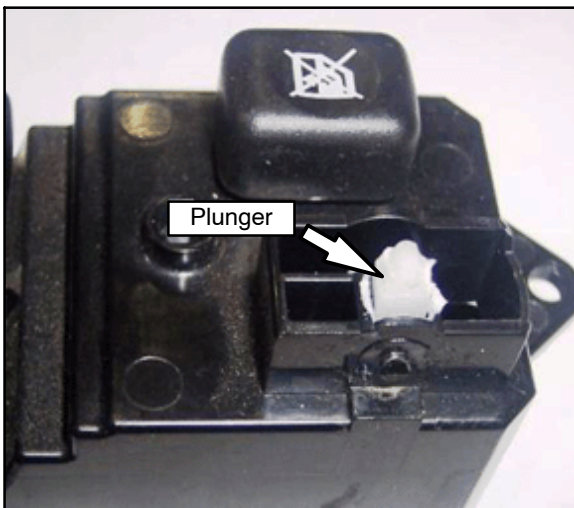

Take special care to prevent damage to the pivot bosses.

- 5. Ensure the plunger inside the switch is undamaged and free of foreign material and debris.

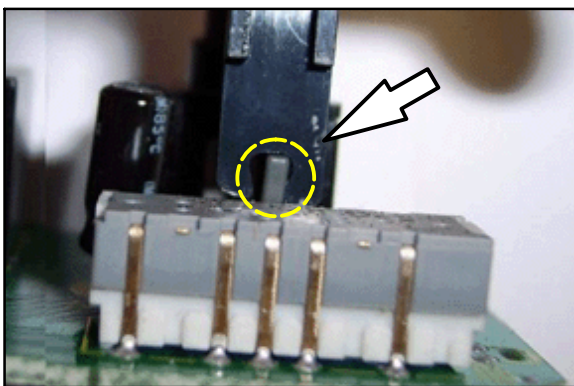

- 6. Look inside the switch assembly. Ensure the switch slide is in the correct position. It should be aligned with the outline around the slide switch assembly.

**!! IMPORTANT !!**

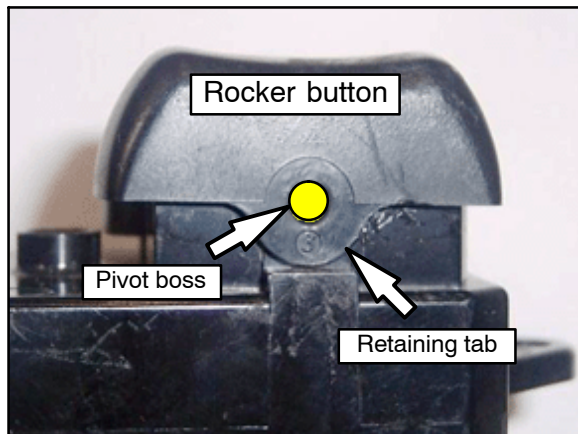

Incorrect switch slide position during assembly will affect door lock switch function.

Board shown removed from switch assembly for photographic purposes.

- 7. Ensure the "U"-shaped cut out on the bottom of the new rocker button's shaft engages the slider switch.

Board shown removed from switch assembly for photographic purposes.

8. Press the new button rocker onto the switch assembly and ensure both tabs completely engage the pivot bosses.
9. Reconnect the door switch assembly to the door harness and reconnect the negative (—) cable.
10. Test door lock, window, and window lock functions. If the door locks do not function properly, remove the rocker button and check the position of the switch slide.
11. Disconnect the switch assembly and negative (—) cable.
12. Reinstall the switch assembly to the inner door panel.
13. Reconnect the switch assembly and reinstall the inner door panel.
14. Reconnect the negative (—) battery cable.
15. Recheck door lock, window, and window lock functions.
16. Reset the clock and restore the customer's audio presets.
