

Hi,

We are excited to bring everyone another option for the Triton Trailers enclosed line, "Keyless Entry". This handy option #16167 keyless entry option allows the user to type in a 4 digit code to unlock the man door without using a key. The code can be changed at anytime to whatever the consumer would like to program in for entry.

This lock is identical to the man door lock we are using in production today, so it will still come with a set of keys that can be used instead of typing in the code and will also have the standard dead bolt lock.

The distributor price will be \$140.00 for this option. An updated accessory price sheet can be found on the distributor suite in the manuals section under the category of Enclosed.

If you have any other questions, please do not hesitate to call or email.

Sincerely,

Doreen Margelowsky
