FSSO ARMREST *NEW CARPET BACK* MOR-
 CARE VINYL * FORD OEM SHIELD KIT *

F550 Armrest

Our new F550 armrest kit lets you attach a flip arm directly to the F550 OEM seat. Our custom made bracket bolts through the cover and foam to existing holes in the OEM frame.

- Armrest bracket bolts directly to the Ford OEM seat with NO DRILLING
- Adjustable Lemans Arm
- Also available for additional charge is a special FSC Ford-F550 cover with Velcro, so covers can match passenger seats.
- Cover will not work on OEM seats with side air bag built in

New Carpet Back

Starting in October 2012, you will see a rolling change in the carpet used on our seat backs. It's a small change but we wanted to make you aware of it. The new carpet is pretty much the same color but has a few other differences.

- It is lighter in weight
- It is softer and less stiff. This means it will upholster better and "hug" the frame and foam better

Current

New

Mor-Care vinyl

Effective immediately we are removing Morbern mor-care vinyls from our in-stock list. They are still available as a special order with a 1,500 yard minimum.

We recommend CMI Level 3.5 Medallion or Level 4 Dimensions as substitutes.

Ford OEM Shield Backrest Conversion kit

Freedman Seating now offers a kit that lets you convert a E350 or E450 OEM seat into a Shield seat. Our kit lets you swap out the OEM backrest with a Shield backrest. Available for delivery in November, 2012

The new backrest:

- Reattaches to three OEM holes
- Reuses the OEM recliner mechanism
- Does not affect OEM seat belts
- Has a Shield adjustable lumbar
- Has a Shield flip arm
- Is available with LeMans arm
- Is available in any cloth or vinyl
- We ship the kit with a seat cover for the OEM seat cushion. This way the seat and back match.
