New! **Air Tab Kit**

11-26-12

Triton Trailers is excited to release a new accessory for the enclosed and TC trailers, the **AirTab Kit**. What is great about the AirTab design is that it helps release the suction off the back door of the enclosed or TC to create less wind drag. The tabs are installed on the roof and both sides of the trailer (shown below). This kit is a factory installation only and tabs are offered only in white or black. Each model of trailer uses a different amount of AirTabs depending on the height and width.

Close Up of AirTabs

The AirTab Kit is a great advantage for any consumer who makes an abundant amount of trips or long mileage trips in a year, because it will help improve the miles/gallon overtime. It also helps reduce the wind drag and allows for a more enjoyable towing experience.

If you have any questions with this option, please feel free to give us a call at Triton. Thank you.

Sincerely,

Triton Sales and Marketing Staff
