Title SDD enhancements for fuel gauge and pump issues -
10MY onwards

Category Engine

Last modified 22-Oct-2012 00:00:00

Symptom 404000 Fuel System Concerns

Issue : Fuel gauge and fuel pump diagnosis using SDD

Cause: Various fuel pump and gauge issues / DTC

Action - This Special Service Message has been released to advise that improved diagnostic information and pin point tests have been released on SDD, for 10MY vehicles onwards.

It is not possible to list all of the improvements in this Special Service Message. Improved diagnostic areas include:

Content

- Fuel level sensor tests
- Fuel gauge tests
- Fuel pump tests

The changes have been released over several SDD releases, beginning at DVD 127.

Please make sure the latest SDD DVD and patches are loaded to take advantage of this new diagnostic information.
