

## UPS7312: Quality Assurance Stop Sale - Update

19-DEC-12

No.: 6-192USA

Section: GENERAL  
INFORMATION

Market: USA

*THIS SERVICE BULLETIN UPDATES 6-191NAS  
AND REMOVES THE QUALITY ASSURANCE STOP SALE*

### **UPDATE:**

After detailed technical investigations, it has been confirmed that Jaguar XF and XJ vehicles fitted with the 3.0L Supercharged V6 (AJ126) engines do not require any remedial action and vehicles with these engines may now be sold.

Concerns highlighted during accelerated-use test work are now known to have been caused by an unrepresentative test, which was not reflective of normally attainable customer duty cycles.

With immediate effect, this Update Prior to Sale Notification is rescinded.

### **ACTION TO BE TAKEN**

On the provision that no other campaigns or UPS Notices are applicable, vehicles covered by UPS7312 are now cleared for sale and customer delivery.

Thank you for your cooperation in this matter. Jaguar apologizes for any inconvenience this may have caused.
