## Corrosion Protection

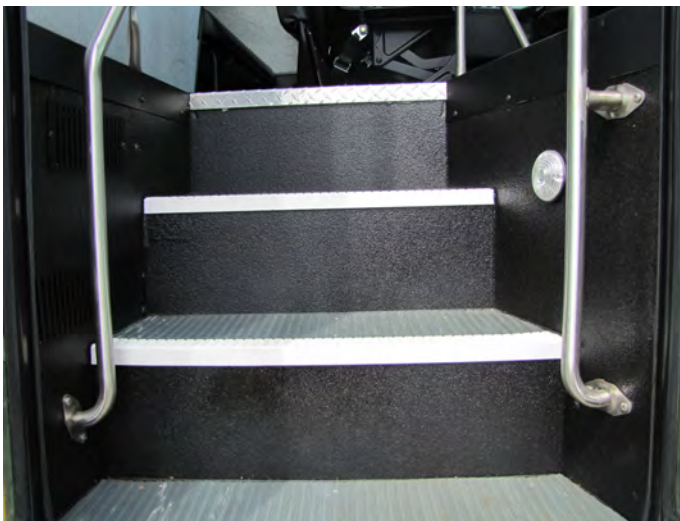

### Saf-T-Liner C2

---

TBB is pleased to introduce three new corrosion protection coatings to help protect against road debris, de-icing chemicals and excessive wear. These new coatings “**TuffCoat**”, “**UnderGuard**” and “**EdgeCover**” can be ordered individually, or in any combination to address your customers needs.

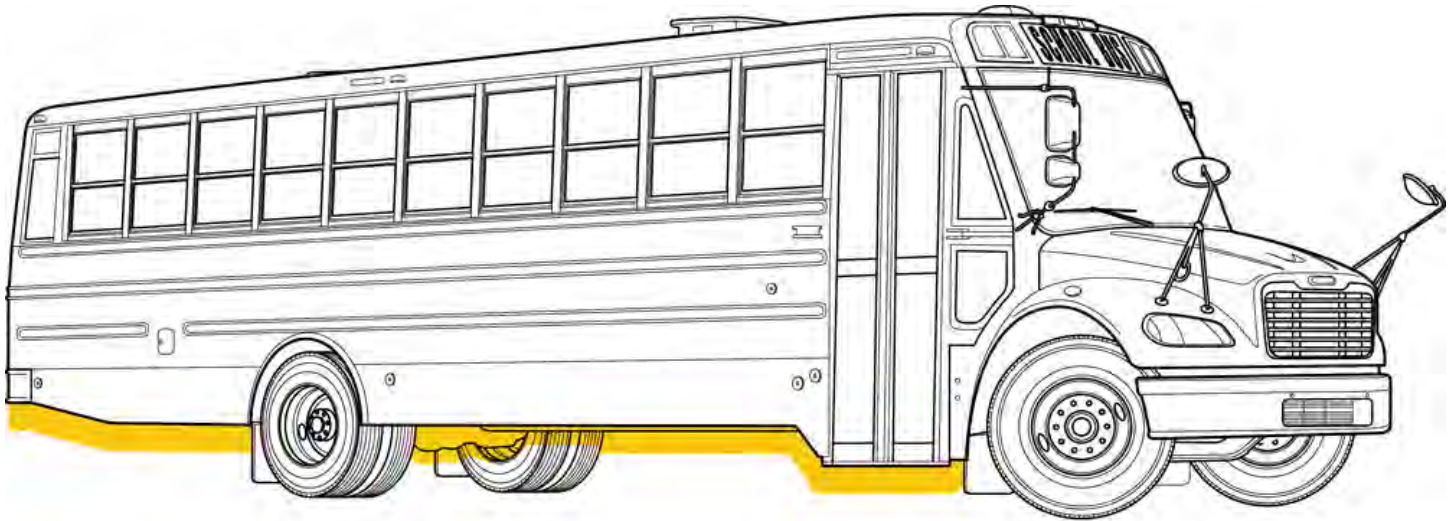

#### TuffCoat - Stepwell D5128-00-000:

- Durable, high-performance coating on the stepwell.
- Guards against corrosion, abrasion, impact and weather.
- Resistant to de-icing chemicals.
- Provides flexible textured surface.
- Dampens noise and vibrations.

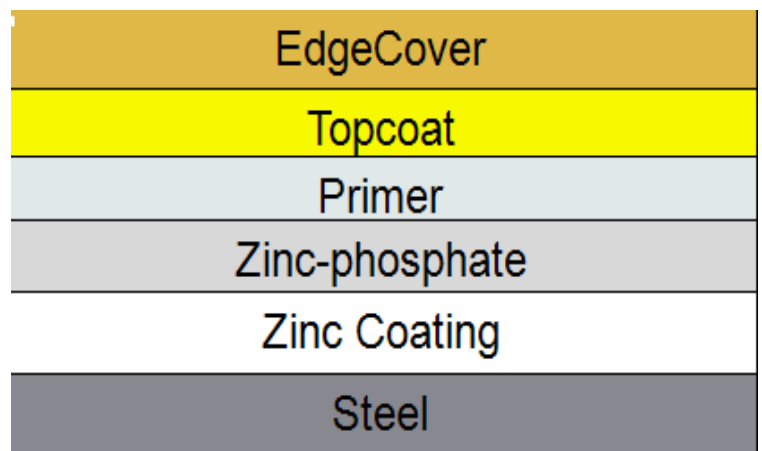

### Undercoating - UnderGuard D5053-02-XXX:

- High performance undercoating applied to the underside of the body.
- Guards against corrosion, abrasion, impact and weather.
- Resistant to de-icing chemicals.
- Durable, self healing formula.
- Used in commercial bus and automobile industries.

### EdgeCover - Exterior Body D5138-00-000:

- Clear protective coating applied on top of the standard paint.
- Applied to various locations:
  - Perimeters of doors
  - Wheelhouse fenderettes
  - Lower skirt seams
  - Door hinges
- Guards against corrosion and weather.
- Resistant to de-icing chemicals.
- Durable, self healing formula.
- Used in commercial bus and automobile industries.

Additional corrosion protection features will be offered in the very near future along with availability on the type A and D product lines.

Further information, literature and training for these products will be coming soon.

Below is a summary of changes that will take effect in ASIST.

<b>Feature</b>	<b>Description</b>	<b>Action</b>
<b>D5053-02-XXX</b>	<b>UNDERCOATING-UNDERGUARD</b>	<b>Released</b>
<b>D5128-00-000</b>	<b>TUFFCOAT-STEPWELL</b>	<b>Released</b>
<b>D5138-00-000</b>	<b>EDGECOVER-EXTERIOR BODY</b>	<b>Released</b>
