## SERVICE PROCEDURE: VELOSTER CLOCK SOFTWARE UPDATE (NON-NAV)

**CAUTION:**

Do not turn off the Audio system, cycle the ignition or remove the USB during the update.

1. With the vehicle's engine running, insert the USB stick while on any screen.

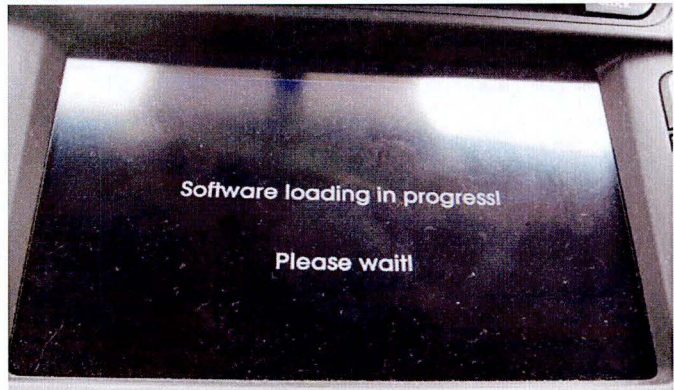

2. To begin the software update process, press "OK" on the screen titled "Software Update!"

3. A "Caution!" screen will be displayed. Follow the warnings as described in the displayed message, and then press "AGREE."

- 4. A load screen will be displayed immediately before the software update begins.

- 5. The first section of the software update will display the "Updating System Software Module" progress bar.

- 6. The second stage of the update process will show the progress in percentage.

- 7. The third stage of the update will show the "Updating Firmware Module" screen and display a progress bar from 0% – 100%.

8. After the software update is complete a blank screen will be displayed, then transition to the regular Veloster splash screen.

9. Update and reboot is now completed. The last source used prior to software update will now resume.

10. Press the **SETUP** Button.

11. Touch the "Info" button.

- 10. To verify the software version, press the "Software Info" button on the display.

- 11. New version: 5.1.39 should be seen.

**Update Complete.**
