2006-2010 Passat, 2009-2012 CC – “Steering Column Defective” Message on MFI

Be aware that the MFI message “Steering Column Defective” does not necessary indicate the electronic steering column lock (ESCL) requires replacement. Be sure to check faults in 25- Immobilizer and 46- Convenience System before performing repair. Fault 00003-014 “Control module defective” in AW 25 and/or AW 46 may indicate a concern with the comfort module.
