

Service Bulletin

PRELIMINARY INFORMATION

Subject: Squeal or Squeak Noise on Brake Apply

Models: 2012-2013 Buick Regal GS

This PI is being revised to add the 2013 model year. Please discard PI0676.

Condition/Concern

Some customers may comment on a squeal or squeak noise on brake apply. Excessive brake dust on the wheels may also be noted. The Regal GS uses special high performance brake linings that are more prone to brake squeal and accumulation of brake dust on the wheels.

Recommendation/Instructions

Dealers can replace the brake linings with the part number below.

Important: Inform the customer that the Regal GS OE pads are designed for track performance use and are required for high energy braking. The original brake linings must be put back on if the vehicle is to be driven on a track.

Parts Information

Part Number	Description
22866931	Front Disc Pad Kit

Warranty Information

For vehicles repaired under warranty, use:

Labor Operation	Description	Labor Time
H0042	Front Disc Brake Pads Replacement	Use Published Labor Operation Time

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from this information.
