Subject: E062 PACCAR MX Engine Doser Fuel Line Clamp Campaign

Dear Kenworth Customer,

Thank you for your purchase of a Kenworth Truck powered by a PACCAR MX Engine. We hope your experience with both the vehicle and engine has exceeded your expectations.

Since the introduction of the PACCAR MX Engine, PACCAR has continued to monitor field performance of the engine and to incorporate design enhancements where possible. One recent enhancement is a fuel line routing and retention update for overall system performance and maintenance benefits.

Kenworth would like to incorporate that update to the engine in your vehicle and ask that you make an appointment with any Kenworth dealership to arrange for this repair. You can find the nearest Kenworth dealer at Dealer Locator on the website www.Kenworth.com.

This repair can be performed at any time convenient, for example during a scheduled maintenance interval, but when contacting your selected Kenworth dealer, refer to campaign E062 and the VIN listed on this letter. The repair will take approximately half an hour* and there will be no charge to you.

We apologize for this inconvenience but ask for your cooperation to ensure continued satisfaction with Kenworth products.

Thank you,

Mike Kalkoske
Director, Quality Services
Kenworth Truck Company

* Additional product improvements have been implemented since introduction of the PACCAR MX engine and your vehicle may be eligible for other no-charge updates. Your selected Kenworth dealer will advise you if this is the case.
