

## **OWNER'S LETTER**

For State of California owners:

Dear Nissan 2.5L Altima Owner:

Nissan has discovered that your 2.5L Altima may be equipped with an improperly calibrated Engine Control Module (ECM) that may incorrectly detect engine valve closure as engine knock. Due to this issue you may experience some minor drivability symptoms and a slight decrease in fuel economy under certain driving conditions.

You should also be aware that if your vehicle is not repaired it will fail a Smog Check test in those areas of California where such testing is required under state law. The California Department of Motor Vehicles, in conjunction with the Air Resources Board, has implemented the Registration Renewal/Recall Tie-In Program, which requires affected vehicles registered in California to complete the recall before the DMV will issue a registration or renewal.

### **What Nissan Will Do**

To correct this condition, Nissan is conducting an Emission Recall Campaign to reprogram the Engine Control Module in your vehicle. For vehicles with greater than 50,000 miles, the manifold catalyst will also be replaced due to possible prolonged exposure to higher than anticipated exhaust gas temperatures. Any cracked manifold catalyst or front exhaust tube with catalyst will be replaced regardless of vehicle mileage. This free ECM reprogramming service should take about one hour to complete, but your Nissan dealer may require your vehicle for a longer period of time if catalysts need to be replaced or based upon their work schedule. **To ensure the least inconvenience for you, it is important that you have an appointment before bringing your vehicle to the dealer for service.**

Your vehicle is eligible for this free service regardless of whether non-original parts were used for previous service and repairs, or if the service was performed by a repair facility other than a Nissan dealer.

### **What You Should Do**

Contact your Nissan dealer at your convenience in order to arrange an appointment to have your vehicle repaired beginning on May 20, 2013. Please bring this notice with you when you keep your service appointment. Instructions have been sent to your Nissan dealer.

If the retailer fails, or is unable to complete the modifications free of charge, you may contact the National Consumer Affairs Department, Nissan North America, Inc., P.O. Box 685003, Franklin, TN 37068-5003. The toll free number is 1-800-NISSAN1 (1-800-647-7261).

Thank you for your cooperation. We are indeed sorry for any inconvenience this may cause you.

For non-California owners:
