Subject: Kenworth NavPlus Software Update

Dear Kenworth Customer,

A software update has been released that resolves an earlier issue with a pre-trip light inspection switch. If your chassis participated in an earlier recall campaign, the functionality is reactivated and the switch will be reinstalled. If your truck did not have this functionality, this campaign will enable it and install the switch as well.

Please contact a Kenworth dealership to schedule an appointment for this work. You can find the nearest Kenworth dealer at Dealer Locator on the website www.Kenworth.com.

When contacting your selected Kenworth dealer, refer to campaign TIB 34-049 and the VIN listed on this letter. There will be no charge to you for repairs within the Basic Vehicle Warranty period (typically 1 year or 100,000 mi/160,000km) or by May 1, 2014, whichever is greater.

Thank you,

Mike Kalkoske
Director, Quality Services
Kenworth Truck Company
