March 2014

Dear Honda Accord Plug-In Owner:

This letter is to notify you of a product update on your Accord Plug-In.

What is the problem?

On some 2014 Accord Plug-Ins, the power control unit (PCU) coolant temperature sensor may fail. If it does, the gasoline engine will start unnecessarily while driving in battery electric mode, but the malfunction indicator lamp (MIL) will not come on. A software update has been developed that will turn on the MIL if the coolant temperature sensor fails.

What should you do?

Contact any authorized Honda dealer for an appointment to have your vehicle's software updated. The dealer will update the software in the HEV generator motor. This work will be done free of charge. Please plan to leave your vehicle at the dealer for a half a day to allow them flexibility in scheduling.

Lessor Information

Please forward a copy of this notice to the lessee.

If you have questions

If you have any questions about this notice, or need assistance with locating a Honda dealer, please call Honda Automobile Customer Service at **800-999-1009**, and select option **4**. You can also locate a dealer online at *Hondacars.com*.

We apologize for any inconvenience this product update may cause you. Our goal is to ensure that your vehicle continues to be as reliable and enjoyable as possible.

Sincerely,

American Honda Motor Co., Inc.
Honda Automobile Division
