

Service Bulletin

PRELIMINARY INFORMATION

Subject: Diagnostic Tip - Heated And Cooled Seat Operation During Remote Start

Models: 2014 Chevrolet Silverado 1500
2014 GMC Sierra 1500

Condition/Concern

Some owners may question at what temperature the heated and/or cooled seats will turn on during a remote vehicle start.

Recommendation/Instructions

If equipped and turned on in the Remote Start personalization menu:

During a remote start, the heated seats will turn on when ambient temperature is below 50 degs F (10 degs C).

During a remote start, the cooled seats will turn on when ambient temperature is above 80 degs F (27 degs C).

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
