Fuel Tank Breather Cleaning

SUBJECT VEHICLES

2013MY – 2014MY COE (XJC710L, XJC720L, XJC740L) vehicles equipped with a side mounted fuel tank that utilizes a separate breather assembly.

CONDITION:

Some vehicles may exhibit a long crank/crank no start condition from low fuel pressure if the fuel tank breather becomes plugged with dirt or debris. A plugged breather could disrupt fuel flow to the engine during engine start, or possibly result in fuel tank damage.
