## 46 Rattling noises from front axle on uneven roads (brake disc)

46 13 60 2035113/2 October 16, 2013. Supersedes Technical Service Bulletin Group 46 number 13-58 dated August 26, 2013 for reasons listed below.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A8	2011 - 2013	All	Not applicable

## Condition

REVISION HISTORY		
Revision	Date	Purpose
2	-	Revised <i>Attachments</i> (Changed video file formats)
1	08/26/2013	Initial publication

Customer may report rattling noises from front axle on uneven roads.

## Technical Background

There are conflicting tolerances in the alignment of pin and hole on the front brake discs.

## Production Solution

Not applicable

## Service

1. Verify that the noise is coming from the front of the vehicle.
2. Remove the front wheels and front brake discs.

**Tip:** Place the brake disc on the brake disc hub (wheel contact surface) so that the friction surface is not damaged during testing.

3. Check the brake discs according to the attached videos. Multiple versions of each video are attached to accommodate various video players and internet browsers.
  - If the brake discs sound like the sound in video 1, the brakes can stay on the vehicle.
  - If the brake discs sound like the sound in video 2, the brake disc pins are loose and are the cause of the rattling noise. Replace both front brake discs.
