Service

Use the Robinair A/C Service Unit to create a printed-out report showing the amount of refrigerant and oil recovered. This report must be submitted with the defective A/C compressor. Follow the steps below:

1. Ensure that the A/C service unit shows the correct date and time (Figure 1). If the date and time are incorrect, use the menu to program the correct date and time before proceeding.

Figure 1. Date and time screen.

Figure 2. System recover in progress.

2. Connect the A/C service unit to the vehicle.

3. Perform a recovery of the system (Figure 2).

7. On the next screen, use the keypad enter the last 8 digits of the VIN then press the **START/YES** key (Figure 6).

 The next screen will request the license plate (Figure 7). Entering the license plate is not necessary. Press the START/YES key to continue.

 The A/C service unit will create a printed report (Figure 8). Send the printed report with the defective A/C compressor. Package the defective compressor in empty packaging from the replacement compressor.
