

Technical Service Bulletin

94 Water accumulation in front fog lights

94 13 04 2032891/1 February 4, 2013.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A4 Ingolstadt	2013	000001-159700	Not Applicable
A4 Neckarsulm	2013	000001-029370	
A5	2013	000001-160500	
A5 CAB	2013	000001-020000	

Condition

The customer complains that large amounts of water can be seen in the base of the fog lamp (Figure 1). No outside influence, such as rock chips, can be found. The fog lamps function normally.

Figure 1. Fog lamp with a significant amount of standing water at the base of the lens.

Tip: For customer complaints of only condensation buildup on fog lamp, refer to TSB 2012749 94 *Exterior lights, moisture accumulation.*

Technical Background

Under certain circumstances, water can enter through the ventilation opening on the back of the fog lamp.

Technical Service Bulletin

Production Solution

A new water-repelling element is installed on the ventilation opening on the back of the fog lamp.

Service

Replace the affected front fog lamp only if a visible amount of water can be seen as being pooled up at the base of the fog lamp.
