

68 Noises from center console

68 13 10 2034517/1 July 15, 2013.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
тт	2010 - 2013	All	All

Condition

While driving the vehicle, the customer hears various noises coming from the center console area.

Technical Background

The noises are caused by too tight of a tolerance between the lower and upper portion of the center console (Figure 1).

Figure 1. No clearance between the upper and lower sections of the center console.

Production Solution

A worker instruction has been implemented for the production process.

Service

Adjust the console sections by following the instructions below. The objective is to eliminate the noise from this area by achieving a 1mm – 2mm clearance between the upper and lower sections of the center console:

1. Remove the covers that conceal the mounting bolts for the lower trim, then loosen the bolts for the center console side trim (Figure 2).

Figure 2. Mounting bolts for the console side trim.

 Remove the center console trim (Figure 3). There are seven clip points.

Figure 3. Removing the center console trim.

3. Remove the Climatronic Control Module (Figure 4).

During removal of the control module, the rubber buffers can fall out. Ensure that these buffers are restored to their original positions when reinstalling the module.

4. Remove the front center console (Figure 5).

Figure 5. Front center console.

Figure 6. Center console mount with adjusting elements.

 Move both adjusting elements into their basic position (Figure 6, arrow 1). Do not tighten. Loosen all 4 of the bolts for the mounting bracket (Figure 6, arrow 2). Push downward on the bracket to its lowest possible adjustment and retighten all 4 mounting bracket bolts.

 Working forward to the center of the console trim, again pull the left edge of the console away from the trim slightly when pressing into place (Figure 9).

Figure 9. Pressing in the left center portion of the console trim.

 Pull the right edge of the console away from the right side of the trim when pressing the right side into place (Figure 10).

Figure 10. Pressing the right side of the console trim into place.
